

Industry: Communications
Application: Digital Microwave Radio
Summary: This 106 Watt, 5 output supply provides an ultra-wide input range for either 24 Vdc or 48 Vdc systems. Features include undervoltage lockout, output monitoring and fault reporting, and programmable thermal shutdown and monitoring.

Specifications

Input: 20 to 60 Vdc
Output: -55 Vdc @ 1.2 Amps
+5.2 Vdc @ 5.0 Amps
+12 Vdc @ 0.4 Amps
+12 Vdc @ 0.4 Amps
-12 Vdc @ 0.4 Amps
Total Power: 106 Watts
Dimensions: 4.8W" x 6.0"L x 1.5"H
Operating Temperature: -40 to +70°C
Cooling: Forced Air
Other Features: Undervoltage Lockout
Programmable Thermal Shutdown
Temperature Reporting
Output Fault Monitor
Overvoltage Shutdown

F-1008: Ultra-wide Input Microwave Radio Power Supply
